Dear sir.

I feel strongly against what the NAB is trying to do to Satellite Radio. XM is a wonderful and fantastic alternative to the overblown commercial stations that play so called "music" that I wouldn't even make a dog listen to. XM offers me a wide plane of music choices and options for other kinds of information and audio enterterainment. on XM I can hear a song that I would never hear on a local radio station as a programmer wouldn't touch it with a ten foot pole. They are too scared of looseing that ever imporant "teenybopper" dollar. So I erge you to let XM keep doing the wonderful work that they have been doing. I had to choice to listen to the god awful sounds for free on local radio or pay the inexpensive price to hear the music I wanted to hear the way it should be, and I chose XM. I must say that it bothers me that in the land of the free when someone starts to do something different they are fought against by people who don't want the competition. So please reject NAB's petition. I feel that it would be against the basic princeables of his country.

Thank you
